**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance: Independent Claim 1 is allowable because the apparatus for pressing shirts specifically requires an outer inflatable body, a supporting framework, and inner inflatable body in combination with a fan that that inflates the outer inflatable body at a given pressure and the inner inflatable body at a greater pressure. The supporting framework of the apparatus provides support for the inner inflatable body resulting in the inner inflatable body abutting the inside of the outer inflatable body. US Patent 2,284,232 to Richa is a good representation of the known art relevant to the instant invention. Richa fails to teach a fan in communication with the outer inflatable body. US Patent 4,303,183 to Schlemon also fails to teach the outer inflatable body in communication with a fan and the inner inflatable body being inflated at a higher pressure than the outer inflatable body. US Patent 2,667,291 to Petrich simply teaches multiple inner inflatable bodies, but does not teach an outer inflatable body that is inflated with a lower pressure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
